Record your own voice to compare your pronunciation to that of a native speaker.

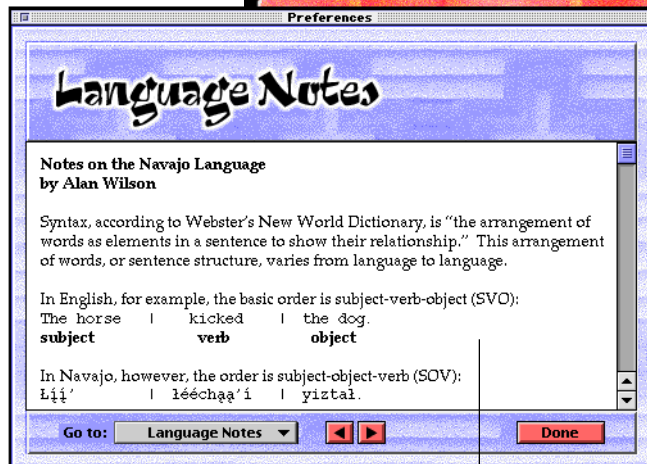

Click on a word in the Navajo sentence to hear it spoken and see its translation.

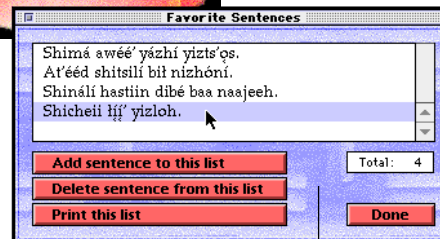

Navajo vocabulary items appear in three scrolling lists: subjects, objects, and verbs. (The list of verbs is shown here.)

Translation of selected word

Translation of current sentence

Linguistic notes by Alan Wilson, technical information, preference settings, and online help are all available at the click of the mouse.

A list of favorite sentences can be printed for future reference.

The Navajo Sentence Machine will help your students learn the proper pronunciation and spelling of Navajo vocabulary. Through playful experimentation, students will discover the basic rules of syntax for both Navajo and English. And once they've constructed a Navajo phrase, students can hear it spoken and view its translation any number of times. They can even create a list of favorite sentences, which can be printed out for class assignments and future reference.

The software incorporates text and audio in a learning tool that is highly interactive and fun to use. It has been thoroughly tested for linguistic accuracy and reliability of performance. The program features online help to answer questions as they arise, and comes with a user guide and linguistic notes about the Navajo language.

Technical Requirements:

Windows Vista or XP. Also works with older Windows operating systems, such as Windows 2000, NT, 98, and 95. Compatible with older Macintosh systems running OS versions 7 through 9. Requires a CD-ROM drive, sound card, and microphone.

Purchasing:

Spooner Instructional Technologies, Inc. gladly accepts both purchase orders and credit cards. Visit the website for more information.
